

## Company Overview

A career at Obsidian Energy means working for a company with a dominant position in Alberta, where safety is valued, high performance matters and potential is realized. Continuous improvement is a cornerstone in Obsidian Energy's evolving culture, and it is critical to our pursuit in becoming the company that redefines oil and gas excellence in western Canada. Obsidian Energy is becoming a performance leader in the areas in which we operate, and we continue to look for the people who see the opportunity before us – to be the best, to put us on top and keep us on top.

## The Role

### Geology Summer Student

Calgary, Alberta

Posting Close Date: January 30, 2026

Obsidian Energy has an exciting opportunity for a geology summer student within our development/exploitation team, starting in May or pending the availability of the candidate. Acting as support to a team of geologists, the successful candidate will complete a project assignment, under the auspices and supervision of one of the Department's Senior Geologists.

## Key Responsibilities

*Duties include the following, but are not limited to:*

Role will center around a core deliverable project designed to utilize real world data from our programs to produce executable and/or analytical value to the organization

- Pick tops, pay intervals, and analyze data covering an area of defined land sections
- Create a suite of maps (structure, isopach, pay thickness, porosity, water saturation) to identify and quantify any resource that may be present
- Identify potential drilling locations if they seem prospective
- An end of summer presentation of findings will be a core deliverable of the work term

*Additional responsibilities may include but are not limited to:*

- Act as support to the development/exploit team and liaise with other departmental teams;
- Day-to-day well file reviews, data gathering and collection;
- Analyze data and deliver findings to the team;
- Evaluate and present additional projects once complete.

## Qualifications

- Enrollment in a Geology Bachelor of Science program and having completed a minimum of year- three of said program
- A strong technical background would be considered an asset
- Familiarity with GeoScout software would be considered an asset but is not mandatory
- Excellent organizational and time management skills
- Excellent communication and analytical skills
- Able to maintain confidentiality
- Eligible to work in Canada

## What Makes Us Attractive

Obsidian Energy is more than just a place to work - it's a community of professionals who are truly committed to the continuous evolution of the company and have interest in its success.

To apply for this position please send a resume to [careers@obsidianenergy.com](mailto:careers@obsidianenergy.com) before **January 30, 2026**, with the job posting title in the subject line.

We thank you for your interest in Obsidian Energy and this position: however only candidates selected for an interview will be contacted.
